DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20, drawn to a container.

Group II, claim(s) 21-51, drawn to a reclosable fastener.

Group III, claim(s) 52-67, drawn to a method of making.

Group IV, claim(s) 68-79, drawn to an apparatus for carrying out a method.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. Groups I-IV lack unity of invention because even though the inventions of these groups require the technical feature of a reclosable fastener, each strip of fastener comprising an elongate body portion which is shaped for releasable engagement with the body portion of the other strip and first and second longitudinal flanges, the first flanges extending away from a plane of separation of the strips and the second flanges extending in the same direction substantially parallel to the plane of separation, this technical feature is not a special technical feature as it does not make a contribution

over the prior art in view of Nichols (USPN 5,931,582). Nichols discloses a reclosable fastener (30) comprising first and second strips of fastener material (32,34) which are engageable with and disengageable from each other, each strip comprising an elongate body portion (48,54) which is shaped for releasable engagement with the body portion of the other strip and first and second longitudinal flanges, the first flanges (74,76) extending away from a plane of separation of the strips and the second flanges (in direction of 60,62 in body portion 54 and in directions of 56,58 in body portion 48) extending in the same direction substantially parallel to the plane of separation.

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP

§ 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
